

Privacy Policy for TBar

Last updated: 03/02/2026

1. Introduction

TBar is a macOS menu bar application designed to display Tesla vehicle charge status using the official Tesla Fleet API. Your privacy is important to us. This Privacy Policy explains how TBar collects, uses, and protects your information.

2. Information We Collect

TBar does not collect, store, or sell personal data on external servers. When you authenticate with Tesla, the application receives access tokens from Tesla's official OAuth process. These tokens allow the app to retrieve vehicle charge status and related vehicle data directly from Tesla.

3. How We Use Information

TBar uses Tesla API access solely to retrieve vehicle charge information such as battery percentage, charging state, estimated time remaining, and related vehicle status data. The app does not access unrelated personal information and does not use your data for analytics, advertising, or profiling.

4. Data Storage and Security

Authentication tokens are stored securely on your Mac using Apple's Keychain services. TBar does not transmit your Tesla credentials to any third-party servers. All communication with Tesla's servers occurs over encrypted HTTPS connections.

5. Data Sharing

TBar does not share, sell, rent, or trade your information with any third parties. All data retrieved from Tesla remains on your local device unless explicitly required by Tesla's official API infrastructure.

6. Third-Party Services

TBar integrates solely with Tesla's official Fleet API. Your use of Tesla services is also governed by Tesla's own Privacy Policy and Terms of Service.

7. Permissions

TBar requires network access to communicate with Tesla's servers. If enabled, macOS notification permissions are used to provide charging alerts. TBar does not request access to your files, location, contacts, camera, microphone, or accessibility features.

8. Data Retention

Vehicle data retrieved from Tesla is processed in real-time and is not permanently stored outside of what is required for app functionality. Authentication tokens remain stored in your macOS Keychain until you log out or uninstall the app.

9. Your Rights

You may revoke TBar's access to your Tesla account at any time through your Tesla account settings. You may also uninstall the app to remove locally stored authentication tokens.

10. Children's Privacy

TBar is not directed toward individuals under the age of 13. The application does not knowingly collect personal information from children.

11. Changes to This Policy

This Privacy Policy may be updated from time to time. Any changes will be reflected by updating the effective date at the top of this document.

12. Contact Information

If you have questions about this Privacy Policy, please contact us at: rezaataiy@gmail.com
